

**A probiotic
innovation for the
optimal microbiome**

BIOPROMOTE®

NEW

BIOPROMOTE®

PROBIOTIC FEED ADDITIVE

BIOPROMOTE® improves the gut health of birds, in the most critical period, at the beginning of their life. With its rapid colonizing ability, BIOPROMOTE® creates a healthy and resilient intestinal flora, that provides long-term protection against facultative pathogens and enhances digestion.

Investment in the optimal microbiome will reward the producer with better production parameters and higher profits.
