SELVERT THERMAL FACIAL TREATMENTS

**ESSENTIAL MOISTURIZING FACIAL TREATMENT FOR NORMAL/
DRY SKIN 60' 17 000 HUF**

Dry, water-loss, lipid-deficient skin shows countless unpleasant symptoms. The skin tightens, itches, facial wrinkles appear. Based on the symptoms, it can be determined that the water-lipid balance of the skin has been upset, and the skin's defense ability has decreased. The effective moisturizing treatment can restore the equilibrium processes and ensure the hydration.

**ESSENTIAL BALANCE FACIAL TREATMENT FOR COMBINED OILY
SKIN 60' 17 000 HUF**

Our skin is protected by an active hydrolipid layer, which consists of a watery and an oily component. If the balance is disrupted, the double protective layer of the skin is broken, the fat layer separates and, rises above the water base, covers the skin and fills the pores. With the treatment our aim is to regulate sebum function, restore the balance process of the hydrolipidic protective layer, and mattify the skin.
